

Trombones

- Addition of the “F-attachment”
 - Thumb-activated valve that changes the key of the instrument from Bb to F
 - Provides an alternate set of slide positions
 - Facilitates faster playing
 - Allows for several notes in the low range that the student-level cannot do
- Larger bore (interior tubing diameter)
 - Helps promote a fuller, more mature sound
- Different bell alloys
 - Can add more warmth and color to the tone
 - Gold-brass
 - Rose-brass
- Increased quality of design and workmanship
- Variety of additional mouthpieces to accommodate specific playing styles
